Portfolio: [Mahmoud Fawzy](#)

OBJECTIVE

Senior Web Developer and Automation Consultant specializing in AI-assisted full-stack development, complex business automations, and Headless CMS architectures. I leverage advanced AI coding agents and LLMs to rapidly architect, debug, and deploy high-performance web applications and automated workflows. Proven ability to translate complex business needs into efficient digital systems that save hours of manual labor and drive growth.

+ TECHNICAL SKILLS

AI-Assisted Engineering: Rapid full-stack architecture, debugging, and deployment using advanced AI coding environments (Claude Code, Google AI Studio, Replit AI) and autonomous agents (Cursor, Antigravity). Experienced in LLM integration and custom prompt pipelines.

Automation & Integrations: n8n (advanced multi-step workflows), Zapier, Make, HubSpot, ActiveCampaign, GoHighLevel, Lemlist – connecting tools and automating complex business logic.

Web Development & Architecture: Headless WordPress architectures, React.js, Next.js, Node.js, MongoDB, Vite, Tailwind CSS, JavaScript, HTML, CSS, Sass, Bootstrap, Vue.js, Nuxt.js.

CMS & E-Commerce: WordPress, WooCommerce, custom theme and plugin configuration.

Performance, SEO & Testing: Technical on-page SEO, site speed optimization, keyword strategy (WooRank, SEMrush), and browser automation/testing (Playwright).

Version Control & Deployment: Netlify, Railway, Vercel, GitHub, Bitbucket and server setup.

Project Management: Agile workflows, cross-team coordination, Jira, comprehensive project road mapping.

+ WORK EXPERIENCE

Freelance AI & Automation Engineer

June 2025 – Present

- Architect and deploy complex business automations using n8n to streamline operations and eliminate manual data entry.
- Engineered a complete automated billing pipeline that captures client data via forms, generates custom-formatted PDF invoices, automates email dispatch, and updates tracking databases.
- Engineered a complete automated job scrapping pipeline that captures jobs from sites like linkedin using apify API and other sites with RSS to then filter jobs based on my skills and use openAI API to add an agent and grade the jobs based the prompt I gave it to then end up with the perfect list of jobs to match my requirements and skills.

Founder & Developer - [Memory Farm](#)

June 2025 – Present

- Concept, architect, and build Memory Farm - an AI-driven emotional journaling and insights platform.
- Implemented block-based memory editor, mood tracking, calendar view, user follow system, and AI insights pipeline (limited daily insights per user to control cost).

- Built backend AI analysis services (GPT/LLM integration + custom prompt pipeline), analytics endpoints, and front-end components (React, Vite, Tailwind).
- Deployed and maintained full-stack app on Netlify / Railway; analytics and error logging in place.
- Responsible for product roadmap (phases for memory viewer rebuild, analytics, moderation, AI assistant).

Senior AI FullStack Developer – WOT Agency

Oct 2025 – Present

- Lead the development of high-performance web platforms and wordpress websites, transitioning from traditional setups to modern Headless architectures.
- Architected and launched a comprehensive Headless WordPress website for a major tourism client (Happy Life Tourism), connecting the WordPress backend to a custom frontend deployed on Vercel to deliver superior load speeds, modern UX, and advanced features and technical SEO.
- Collaborate with marketing and UX teams to optimize conversion, design, speed, and usability across multiple client projects.

Senior WordPress / Front-End Developer – Comma Agency

October 2024 – September 2025

- Led the development and maintenance of multiple **WordPress** sites, from domain acquisition to server setup and ongoing support.
- Worked on **SEO optimization** using tools such as **WooRank** and **SEMrush**, including performance improvements and on-page SEO for higher search engine visibility.

Senior WordPress / Front-End Developer - JMI

May 2020 – May 2024, Giza, Egypt

- Led the development and maintenance of multiple **WordPress** and **Shopify** sites, from domain acquisition to server setup and ongoing support.
- Worked on **SEO optimization** using tools such as **WooRank** and **SEMrush**, including performance improvements and on-page SEO for higher search engine visibility.
- Built and maintained landing pages for marketing campaigns using **Landingi**.

Junior WordPress / Front-End Developer – Worcbox

October 2019 – April 2020, Cairo, Egypt

- Built user interfaces for various company projects, collaborating with backend developers and designers to ensure seamless functionality and integration.

Junior WordPress / Front-End Developer - Jobzella.com

February 2018 – October 2019, Cairo, Egypt

- Assisted in the development of **WordPress** sites and worked on various **UI/UX tasks** to improve the overall website design and functionality.

Data Entry Specialist - Jobzella.com

November 2017 – February 2018, Cairo, Egypt

Data Entry Specialist - Dar El Naskh

November 2010 – November 2017, Giza, Egypt
